General information

This Dzardzongke keyboard uses the Dzardzongke orthography developed by Marieke Meelen and Charles Ramble. It is based on a standard English keyboard, with the addition of the special characters **á é í ó ú Á É Í Ó Ú** to represent contrastive high tone.

Typing special characters on a computer

On a computer keyboard, type the semicolon ; and then the corresponding vowel to produce **á é í ó ú Á É Í Ó Ú**, as in:

; + a > á	; + A > Á
; + e > é	; + E > É
; + i > í	; + I > Í
; + o > ó	; + O > Ó
; + u > ú	; + U > Ú

To type the semicolon ; by itself, you need to press the ; key twice.

Typing special characters on a touchscreen

On a phone or tablet, press and hold on the vowel to see and select the special character.
